

Self Introduction:

Hi Sir/Mam ,i am Shaik Javier . I belong to Kodur from Andhra Pradesh.I have done my engineering from Sree rama engineering college tirupati.I am a hard working engineering graduate specialised in computer science engineering with an over all CGPA of 60 percent. During my engineering i have given seminars on cloud computing and i have participated in several technical quiz competitions as i was very interested on them . Post completion of my engineering i started exploring professional oppurtunities by learning few technical skills which helps to excel in software organization Also i am technically good at Blogging which includes HTML and CSS ,i am also aware of c programming , python and power BI.

Along with my degree i am well interested on Data science and the reason why i choose data science as my career is that it has already been declared as the hottest job and data scientists are the one who know how to use their skills in math ,statistics ,programming and other related subjects to organise large data sets so that we as a data scientist can apply our knowledge to uncover solutions hidden in the data to take on business challenges and goals.Data science also gives a meaning to the raw data and covertis in to meaningfull insights that can be used to grow business and recognize markets trends.
